

Enterprize Container Corporation

IBC ACCEPTANCE POLICY

To qualify IBC totes for return, totes must be:

- Completely **EMPTY (DRIP DRY)** If the valve is opened and product comes out, we do not consider the container to be empty.
- For residues or products specifically specified in 40 CFR 261.31, 261.32, 261.33(e), the container is empty **ONLY** if the container has been triple rinsed using a solvent capable of removing the last contained material.
- Any containers received with excess hazardous residues or products specifically specified in 40 CFR 261.31, 261.32, 261.33(e) will be rejected and returned to the shipper at the shipper's expense.
- Caps and labels must be in place and valves must be closed. DOT's 49 CFR 173.29 states that all openings of the empty containers must be closed, and that all markings and labels must be in place as if the container was full of its original contents.
- IBCs last containing a non hazardous material should be empty (**DRIP DRY**) with all closures and original labels in place. Enterprize will accept up to 1" of non hazardous material at no charge. Any containers received with excess non hazardous residue above one inch will be charged a \$10 per gallon disposal fee or the containers may be returned to the shipper at the shipper's expense and a handling fee may apply.
- MSDS are to be provided to Enterprize Container for review of previous products contained in the IBC tote and approved before pick up. Written approval will be provided once approved.
- A provided empty IBC tote BOL must be signed at time of shipment by representative of company with knowledge of Enterprize Container pick up policies and accompany the load to be delivered to Enterprize Container.
